Andrew LeClair —

Graphic designer currently based in Providence, RI and working towards an MFA in graphic design at RISD. Interested in the intersection between design, technology, tools, and systems of publishing and production.

This website is a loose archive of recent, completed, and ongoing projects, and will be expanded and revised over the coming year.

(2010) DIRECTORY TREE, VISUALIZATION

A data visualization mashup. R-systems — recursive algorithms derived from the natural world — were used to generate three-dimensional models of the structure of files on my hard drive.
